

Instructions

You are participating in an experiment on economic decision-making and will be asked to make a number of decisions. If you follow the instructions carefully, you can earn a considerable amount of money. At the end of the experiment, you will be paid your earnings in private and in cash.

During the experiment you are not allowed to talk to other participants. You can ask your questions after the instructions and before we start the experiment.

Your earnings depend on your own decisions and on the decisions of one other participant. The identity of the other participant will not be revealed. The other participant remains the same during the entire experiment and will be referred to as “the other” in what follows.

The experiment consists of 30 periods. In each period you have to choose a number between 0.0 and 28.0 (in increments of 0.1 points). The other also chooses a number between 0.0 and 28.0. Your earnings in points depend on your choice and the other’s choice. The table you have received gives information about your earnings for some combinations of your choice and the other’s choice. The other gets the same table.

At each period there will be two stages. In the first stage you are allowed to communicate with the other. In the second stage you will make a decision. In the first stage, your screen will look

If you want to terminate the chat and move to next stage, press "Finish Chat" button. You will be taken to the next stage, if the other subject press the "Finsh Chat" button as well.

If you would like to communicate with the other player, please enter the message in the blue space in the bottom and press "Return".

like the picture below.

In this first stage, you can calculate your and the other’s earnings in more detail (for choices that are not multiples of 2 for instance) by using the EARNINGS CALCULATOR on the left of your screen. On the right, you can communicate with the other through a chat box, during 1 minute. You can type your message in the bar at the bottom right and hit “Return”. Only you and the other will be able to see the messages you send and you are allowed to post as many messages as you like. The same is true for the other. The messages you send should not identify yourself (e.g., name, age, gender, location, etc.) in any case and you may not use offensive language. If you want to finish chat before 1 minute, you can click “Finish Chat” button at the top right. If the other also clicks this button, communication will end and you will move to next stage.

In the second stage, your screen will look like the picture below.

In this stage you will not communicate but you will make your decision. You will see the message history at the top left of the screen. At the bottom left, you can use the Earnings Calculator, same as before. At the top right you are asked to type in your choice and click “Enter”. In each period you have about 1 minute to enter your decision. A history of your and the other’s past choices and earnings is available at the bottom right of your screen.

Continue

At the end of each period you are informed about the other’s choice and your and the other’s earnings in that period as in the picture below.

Your total earnings in points are the sum of your earnings in points over the 30 periods. Your earnings in points will be converted into EUR according to the rate: 100 points = 1 EUR.

Now we move to the trial period. The result of the trial period will not be counted into your earnings. Please follow our instructions in the trial period.
